Bohdan Lishchenko

Front-End Developer

I'm well-organised, self-motivasted, resourceful and able to motivate others, with excellent communication and interpersonal skills. I'm stubborn in achieving the final result, ready to do complex work and learn new technologies/get new knowledge. I've been creating single page applications on React and JavaScript for a year. Also I've been practicing web layout design for about two years. I strive to become a successful Front-end developer. My main goal is to become a great Team Lead in the future.
